

Starting a business is not a decision to be made lightly and having the right information and professional advice to hand is essential.

At Business-Startup.ie our aim is to direct you to the best online resources available for starting a business, as well as providing details of a range of service providers in your area who can provide detailed advice in relation to accounting, company formation, business finance, marketing, franchising and a whole range of other services vital to your business success. A particular emphasis will be placed on the internet and what is required to establish a profitable business presence online.

From time to time, we shall publish articles and posts on a wide range of issues as well as pointing you in the direction of some great resources, both Irish and foreign, which we believe can prove useful in your journey to establish a successful business.

The role of the City & County Enterprise Boards in promoting entrepreneurship in Ireland is an important one and we shall also endeavour to keep you up to date in terms of training programmes and seminars being run all around the country. In many cases, training costs are very heavily subsidised and for cash strapped entrepreneurs this means that new skills can be acquired without having to spend an absolute fortune.

Just launched is our forum where we hope that entrepreneurial minded individuals will exchange information and views and make the difficult path of successfully starting a business that little bit easier.

As this is also the start of our online venture we look forward to sharing with you the ups and downs of starting a business as well as hearing how you cope with the various challenges and problems of going it alone!
